PROFESSIONAL SUMMARY

Senior Infrastructure & Platform Architect with over 20 years of experience designing, optimizing, and scaling cloud-native ecosystems across AWS, GCP, and Azure. Expert at bridging deep engineering automation with high-level executive and financial visibility.

- **Platform & AI Engineering:** Pioneer in building custom Internal Developer Platforms (IDP) and AI/MLOps toolchains, utilizing proprietary DAG orchestration engines (coregraph), local RAG pipelines, and cross-platform IDE-to-browser ecosystems (SyncbridgeAI).
- **Automated Fleet Operations:** Expertise creating real-time incident orchestration engines (CO-Tooling-Bot) and service compliance monitors (OAR Renewals) to eliminate manual workflows and protect large-scale cloud fleets.
- **Enterprise Operational Intelligence:** Proven track record architecting cross-domain visibility solutions (KOIP) that map, track, and optimize compute, storage, and network capacity across multi-cloud and bare-metal environments.
- **SRE & Cross-Functional Leadership:** Deeply experienced in SRE disciplines and 24/7 incident management, consistently maintaining 99.9% enterprise platform uptime while leading cross-functional DevOps, CloudOps, and security initiatives.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EKS, IAM, EC2, S3), GCP, DigitalOcean, Azure.
- **DevOps & GitOps:** ArgoCD, Flux, Terraform, CloudFormation, Ansible, AWX, Helm.
- **Platform & AI/MLOps:** coregraph (Proprietary DAG Orchestration), KOIP (FinOps Platform), SyncbridgeAI (IDE-to-Browser Bridge), CO-Tooling-Bot (Incident Platform), OAR Renewals, JobMatch CLI/GUI, RAG Pipelines, Python, Ollama, ChromaDB.
- **Development Stacks:** Node.js (npm), TypeScript, JavaScript, Python, FastAPI, Streamlit, Bash, SQL, VS Code Extension API, Browser Extension APIs.
- **Containerization:** Kubernetes (K8s), Docker, Rancher, Container Security & Hardening.
- **Observability & SRE:** Prometheus, Grafana, Kibana, Splunk, PagerDuty, NetBox.
- **Strategy & Operations:** Capacity Management, Executive Reporting (CTO/CFO level), Disaster Recovery (DR), BCP, Financial Tracking.

PROFESSIONAL EXPERIENCE

DigitalOcean — Cloud Operations Engineer II

06/2024 – Present

- **Core Cloud Operations:** Manage and optimize high-availability bare-metal hypervisors, cloud infrastructure components, and distributed data systems across global data centers.
- **Fleet Automation & IaC:** Utilize Terraform and Ansible AWX to automate hypervisor recovery, streamline bare-metal server provisioning, and orchestrate automated data migrations with zero customer impact.
- **CO-Tooling-Bot Orchestration:** Architected a real-time CloudOps incident response platform using Python, FastAPI, and asyncio to automate complex hypervisor remediation across parallel multi-step escalation paths.
- **Internal Product Development (coregraph):** Engineered an internal, proprietary DAG-based engine to map and manage complex infrastructure endpoints and cross-resource dependencies.
- **Operational Intelligence & Scale (KOIP):** Spearheaded the architectural design of a cross-functional infrastructure intelligence suite to track, analyze, and optimize compute, storage, and network capacity across hybrid fleets.
- **Platform AI Integration:** Built secure RAG pipelines and interactive workspace monitoring dashboards using Python and Backstage APIs to accelerate internal developer workflows.
- **Incident Management & SRE:** Participate in 24/7 on-call rotations, driving rapid resolution of complex infrastructure degradation, conducting deep post-mortems, and systematically reducing MTTR through self-healing automation.

SkyNet Software Inc. — Senior Administrator Infrastructure & Systems

06/2023 – 04/2024

- **AWS Orchestration:** Architected production-grade EKS clusters, focusing on high availability and seamless node group scaling.
- **Security & IAM:** Applied least-privilege security by crafting granular AWS IAM roles and policies for service-to-service communication.
- **Cost Optimization:** Significantly reduced cloud spend through EC2 right-sizing and S3 lifecycle automation.
- **IaC Execution:** Accelerated cloud provisioning workflows by 40% using reusable Terraform and Ansible templates.

Scotiabank — Tech Lead Data Integrations (Platform Engineering)

04/2022 – 01/2023

- **GCP Transformation:** Orchestrated zero-downtime migration of on-premise K8s applications and storage services to Google Cloud.
- **Security Integration:** Implemented HashiCorp Vault for unified secret management across hybrid-cloud clusters.
- **Hybrid Orchestration:** Maintained business continuity while managing legacy CloudFormation alongside modern Terraform stacks.

OpenText — Lead Site Reliability Engineer

08/2021 – 04/2022

- **SRE Leadership:** Managed microservices architectures using Docker and Kubernetes, ensuring 99.9% platform uptime.
- **Automation Stacks:** Built stable Pre-Prod and Prod infrastructure deployment pipelines using RunDeck and Helm.
- **Security Compliance:** Implemented vulnerability management (Qualys) and endpoint security (SentinelOne) to adhere to strict corporate security standards.

Scotiabank — Infrastructure Consultant / Technical Specialist Advisory

04/2016 – 08/2021

- **Core Banking Ops:** Designed IaC solutions via Terraform and orchestrated core banking applications on Kubernetes.
- **Leadership:** Managed cross-functional IT teams across Infrastructure, Network Operations, and Security domains.
- **Compliance:** Ensured all hybrid-cloud architecture adhered to strict financial regulatory and data protection standards.

TECHNICAL INNOVATIONS & PRODUCT DEVELOPMENT

- **CO-Tooling-Bot (CloudOps Incident Response Platform):** Built a high-concurrency internal tool automating hypervisor incident response for global infrastructure fleets. Consolidates multi-terminal, manual workflows into a unified CLI and web dashboard using Python, FastAPI, and asyncio. Implements pluggable, YAML-driven playbooks with multi-tiered escalation ladders (SSH → console → IPMI → PDU power-cycle) alongside native Atlantis, Shipyard, and PagerDuty alert integrations.
- **OAR Renewals (Service Catalog Compliance Platform):** Designed and deployed a containerized compliance orchestration suite automating Operational Availability Reviews across 1,200+ production microservices. Built with Python, PostgreSQL, SQLAlchemy, and Streamlit; leverages batched hourly catalog ingestion, automated metadata gap detection (ownership, PagerDuty, Jira tokens), and resilient deduplication logic to provide continuous operability reporting.
- **KOIP (Kubernetes Operational Intelligence Platform):** Evolved into a comprehensive infrastructure intelligence suite mapping, analyzing, and optimizing cross-domain costs across multi-cloud and bare-metal environments (VMs, storage, network layers). Empowers DevOps, FinOps, and executive stakeholders by generating automated efficiency analytics while defending SRE stability metrics.
- **coregraph:** A proprietary architectural component engineered to map, manage, and visualize complex Directed Acyclic Graph (DAG) relationships and infrastructure endpoints across underlying platform networks.
- **SyncbridgeAI:** A cross-platform IDE-to-browser toolchain built using Node.js (npm) and TypeScript. It bridges local developer workspaces with web-based LLM chat interfaces by syncing states and execution hooks between a local VS Code extension and a custom Chrome extension.
- **JobMatch CLI/GUI:** A local, single-user automation utility written in Python that runs semantic parsing and matching algorithms entirely offline, executing conditional upstream LLM API hooks (Claude) to dynamically tailor pipeline artifacts.

EDUCATION & CERTIFICATIONS

- **Masters in IT (MSIT) | PIMSAT**
- Certified Kubernetes Administrator (CKA)
- AWS DevOps Engineer Professional
- AWS Solutions Architect Associate
- GitHub Copilot Certification
- VMWare VCP (DC-DV)
- MCSE / MCITP
- MCP Azure
